Profile

As a Software Developer with 3.5 years of professional experience at GLOMIL Technology, I specialize in developing modern, scalable, and high-performance web applications. I have strong expertise in React, Next.js, Astro, TypeScript, and Tailwind CSS technologies, and I prioritize creating clean and sustainable code structures that focus on user experience. Using modern animation and interaction technologies such as Framer Motion, GSAP, and Three.js, I develop visually impressive and media-focused digital experiences. I have worked with teams from diverse disciplines on public institutions, corporate firms, and large-scale projects, creating reliable, user-centric solutions. I value continuous learning and adopting up-to-date software development approaches; I aim to develop projects that combine functionality with strong visual designs, focusing on performance optimization, responsive design, accessibility, and high-quality user experience.

Professional Experience

GLOMIL Technology

Software Developer

2023 – Present
Sarıyer, İstanbul

Volunteer Internship

2022 – 2023
Sarıyer, İstanbul

Projects

GoTürkiye

Official Travel Guide to Türkiye

I developed email templates and managed content workflows for Türkiye's official tourism platform.

Culture Route Festival 2024

Ministry of Culture and Tourism

I worked on web-based software and email systems to improve event communication.

Atatürk Cultural Center (AKM)

Ministry of Culture and Tourism

I provided support for digital engagement through content and email template development.

Health Türkiye

Ministry of Health

I participated in software and content development efforts to improve the platform's global visibility and user experience.
